

Fractions *Go Fish*

Players:

2

Materials:

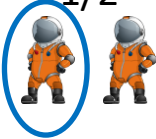

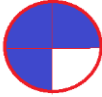

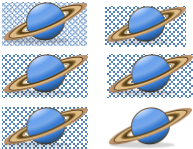

Fractions Go Fish Cards

(Cut the cards apart and stack them into a deck.)

Procedures:

1. Mix the cards well.
2. Give each player 5 cards.
3. Leave the rest stacked in a deck facing down.
4. Take turns asking each other for cards in order to get a set of four.
You will say, **“Give me all of your *three fourths*.”**
If the other player has any $\frac{3}{4}$ cards, they will give them to you. If not, they will say, **“Go Fish.”**
5. If the other player does not have a card to give you, you will have to “Go Fish” which means choose one card from the deck and add it to your cards.
6. Once you get a set of four of the same fraction cards ($\frac{1}{2}$, $\frac{1}{2}$, $\frac{1}{2}$, $\frac{1}{2}$), place the set on the table.
7. The player with the most sets of four is the winner!
