

Representing Equivalent Fractions on a Number Line

Look at the two fractions. Plot them on the number lines to see if they are equivalent. Circle yes or no to answer the question.

$\frac{2}{4}$ $\frac{4}{8}$		Are the two fractions equivalent? <input checked="" type="radio"/> Yes <input type="radio"/> No
-----------------------------	--	--

$\frac{1}{4}$ $\frac{5}{6}$		Are the two fractions equivalent? <input type="radio"/> Yes <input type="radio"/> No
-----------------------------	--	---

$\frac{3}{4}$ $\frac{6}{8}$		Are the two fractions equivalent? <input type="radio"/> Yes <input type="radio"/> No
-----------------------------	--	---

$\frac{9}{10}$ $\frac{5}{8}$		Are the two fractions equivalent? <input type="radio"/> Yes <input type="radio"/> No
------------------------------	--	---

$\frac{1}{2}$ $\frac{3}{6}$		Are the two fractions equivalent? <input type="radio"/> Yes <input type="radio"/> No
-----------------------------	--	---

$\frac{7}{10}$ $\frac{7}{8}$		Are the two fractions equivalent? <input type="radio"/> Yes <input type="radio"/> No
------------------------------	--	---
