

# Find Your Way to Mars!

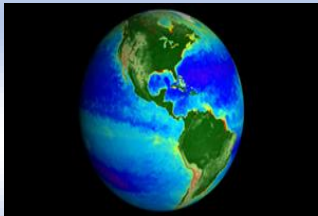

## Directions:

1. Cut out the rocket. (This is your game piece.)
2. Cut apart the cards. Each card will have a fraction, a mixed numeral, or a mixed numeral written as a fraction.
3. You must draw a card from the stack and find that number on the number line.
4. For every card you get correct, you move ahead one space.
5. For every card you don't get correct, you must move back one space.
6. See how quickly you can "travel from Earth to Mars!"

**Hint to Help:** Notice how there are 5 marks between 0 – 1, 1-2, and 2-3. On your gameboard between the numbers 0 – 1 on the tick marks write  $\frac{1}{5}$ ,  $\frac{2}{5}$ ,  $\frac{3}{5}$ ,  $\frac{4}{5}$ ,  $\frac{5}{5}$ . Remember,  $\frac{5}{5} = 1$ , so on the next tick mark after one you would write  $\frac{6}{5}$  and so on...

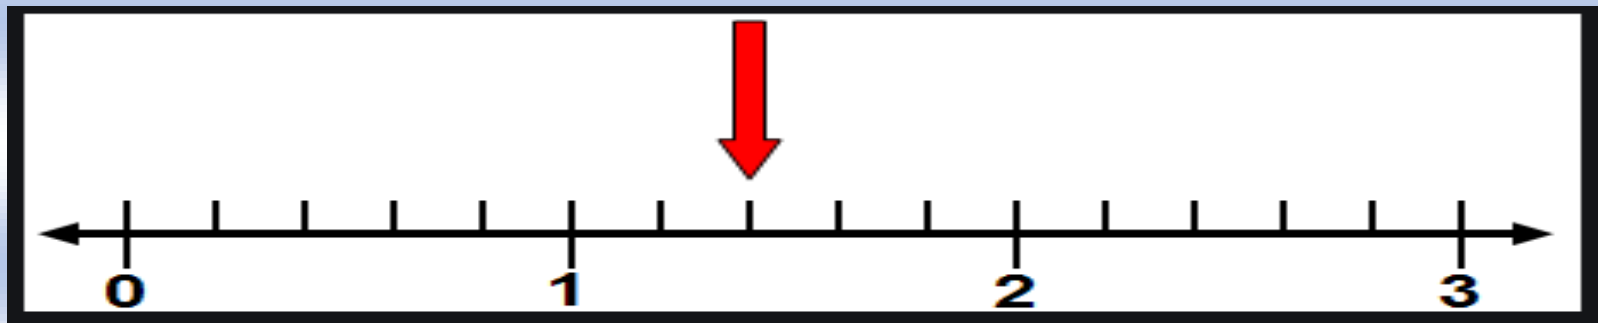

## Game Board

Earth

Mars

Game Cards:

$\frac{6}{5}$	$1\frac{1}{5}$	$\frac{7}{5}$	$1\frac{2}{5}$
$\frac{8}{5}$	$1\frac{3}{5}$	$\frac{9}{5}$	$1\frac{4}{5}$
$\frac{10}{5}$	2	$\frac{11}{5}$	$2\frac{1}{5}$
