

Readers can **identify** and explain how the author uses idioms, metaphors, or **personification** to **shape meaning** and **style**.

### Personification

giving an animal or object human-like qualities

"The sun smiled at me from above."

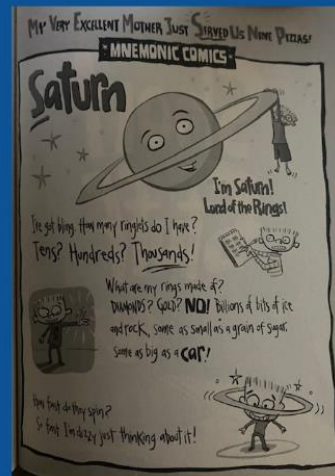

## Read Aloud

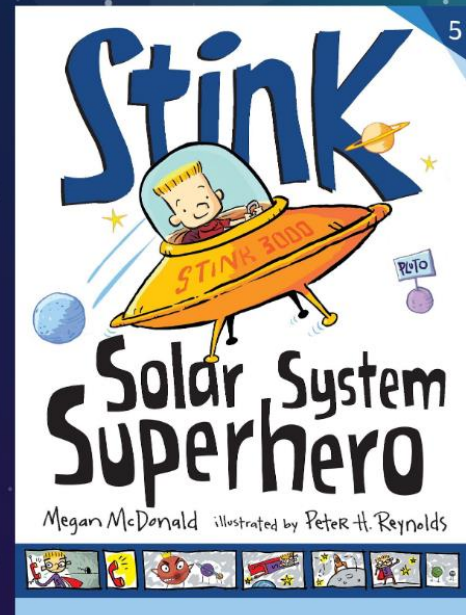

So, in the passage below what human characteristics are given to Saturn?

- Planets do not have bling, people do.
- Planets do not talk; people talk.

"I'm Saturn! Lord of the Rings! I've got bling. How many ringlets do I have?"

## Read Aloud

# Phonics

When a **vowel** is followed by a **consonant** and then an **e**, the vowel makes a long vowel sound. In a **CVCe** word with a letter i, the vowel will make the sound /i/ as in kite.

"What are my rings made of? Billions of bits of ice and rock."

# CVCe Magic Wand

kite

kite

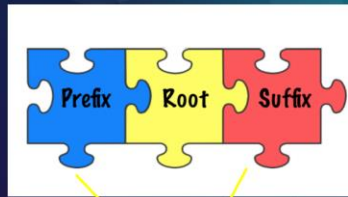

pine

pine

## Teaching Point:

Readers use their knowledge of the CVCe pattern to help themselves read and spell unfamiliar words.

Readers can **determine** (figure out) the meaning of a word when an **affix** (word part that contains meaning) is added to a base word.

affixes

**Teaching Point:** Readers can use their knowledge of word parts (affixes) to figure out unknown words.

#### Jupiter Facts for Kids

Jupiter is the **largest** planet in our solar system. Its famous 'Red Spot' and raging gas storms give it an impressive if not intimidating appearance. As well as having many moons, Jupiter also has a number of rings similar to that of Saturn but much less noticeable.

- Jupiter is the largest planet in our Solar system. It is so big that more than 1300 Earths could fit inside it.
- Thick, **colorful** clouds of **deadly** poisonous gases surround Jupiter. The quick spinning of the planet whips up the atmosphere, creating the bands around the planet.
- If you were to descend into Jupiter, the thin, cold atmosphere becomes thicker and hotter **gradually** turning into a thick, dark fog. In the **blackness** about 1000km down the pressure squeezes the atmosphere so hard that it becomes like liquid.
- At the center of Jupiter is a rocky core, **slightly** bigger than Earth but weighing about 20 times more.

-est

most

-able

capable of

-ful

full of

-ly

characteristic of

-ness

quality of

Look at the word **noticeable** at the end of the first paragraph. Because I know the suffix **-able** means **capable of**, and I see the word **notice** in the word noticeable, I can figure out that noticeable must mean capable of being noticed.
