

# Life of a Plant by Risa Jordan

(Accompanies Day 3)

**Complete** this activity in your reader's notebook or on a piece of paper.

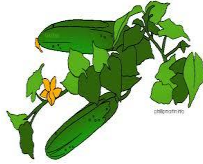

**Choose** 2 different sections in the boxes below to illustrate

**Draw a picture** which shows what is happening in each of the sections you chose.

**Write** a caption to go with it. [A **caption** tells about the picture.]

**Explain** your illustrations and captions to another person.

[You do **NOT** need to copy what is in each box. Your picture with its caption should be clear enough so that a person could tell which section it goes with.]

**Cucumbers grow  
on vines.**

[The information under the picture is called a **caption**.]

A plant will grow from a tiny seed,  
Some water and sun is all you need.  
First the roots grow underground,  
They suck up minerals from all around.

Then come stems, some tall, some stout,  
And next the branches spread about.  
Leaves grow in all shapes and sizes,  
Watch this new life as it rises.

Flowers bloom from buds on stems,  
They are as pretty as precious gems.  
Some plants give us juicy fruit,  
Some have vegetables at the root.

New seeds travel to and fro,  
By wind and water, on the go.  
And the cycle keeps on going,  
Soon new stems and leaves are showing.
