

Summer Learning is **Out of this WORLD!**

Daily Routines:

★ Each day I will:

- **Reading:** Read a text of your choice for 20 minutes each day.
- **Writing:** Keep a daily journal. Writing an entry about a topic of your choice.
- **Math:** Practice addition, subtraction, multiplication, and division math facts for 10 minutes each day! Create or print math fact flashcards.

3rd Grade Choice Board

Each day I will choose **ONE** activity in **Reading & Writing**, **Math** and a **Choice Area**.

Reading & Writing 	Math 	Choice Area 
Make a video of you reading your favorite picture book. Share the video with someone who would enjoy it.	Have a paper airplane challenge with your family. Design your airplane. Whose airplane will fly the farthest? Make sure to measure the length of each plane's flight to see who wins the contest.	Have a dance party! Put on your favorite music and dance to the beat. Invite your family to join in. Create a dance routine and teach it to your family.
Before you read the next chapter/section of your book, write 5 questions you have about your book. As you read, write the answers to your questions.	Create three patterns using skip counting with at least 6 numbers in the pattern. Ask a family member to guess what number you skip counted by.	Write a persuasive letter convincing someone to help spread kindness. Give at least 3 reasons why they should help.
Read the lyrics to a song you like. Think about what message the song is trying to send. Write about why you like the song and why the message of the song is important.	Create five multiplication problems for an adult family member to solve. Check their answers and show them how to solve the ones they missed.	Grab a deck of cards or make cards. Flip a card over and move as many times as the number on the card. You could hop, skip, jump, stretch, stomp, spin, etc.
Read a story of your choice. Compare the setting in the story to the setting in the place where you live. Write a comparison of what is similar and what is different. Draw an illustration of both settings. Label it. Share with your family.	Make a list of your top five favorite candies. Take a poll (call or email) friends and family asking them about which of the five candies is their favorite. Make a graph to show your findings. Write about your findings, too.	Design your dream bedroom. Draw your design on a piece of paper. Label all of your bedroom parts. Share your design with a family member.
Think of a topic that you know a lot about. Write an informational book about that topic. Be sure to include a table of contents and many illustrations with captions and labels.	Make a detailed schedule of what you did yesterday. Write the times next to each activity. Then calculate how much time you spent doing these four things: sleeping, playing, eating, and being helpful at home.	Create a list of 3 to 5 goals for the week. Share your goals with a family member. Create a plan for accomplishing each goal.
Create a joke book by writing at least 5 of your favorite jokes in it. Illustrate the book. Make it fun! Share it with your family.	Write these numbers in expanded form (word form): 184, 527, 842, 631 and 906.	Make a list of qualities you love about yourself. Hang the list somewhere where you can see it each day.
