

## Pluto (dwarf planet) Poem

Is Pluto a planet?  
I think I forgot!  
NASA called it a planet,  
But now it does not!  
A planet one time,  
The 9th from the sun,  
But now it's demoted,  
Its title undone,  
Hard rock and cold ice,  
Found deep in dark space,  
With Eris and Ceres,  
It shares a strange place,  
It's called a dwarf planet,  
Orbits the skies,  
But not a true planet,  
Based on its size!

-Author Unknown

\*\*There are 5 officially recognized dwarf planets in our solar system, they are **Ceres**, Pluto, Haumea, Makemake and **Eris**. With the exception of **Ceres**, which is located in the asteroid belt, the other dwarf planets are found in the outer solar system.
