

Second Grade Math

Dear Parents,

We are happy that you and your child are working on the second-grade math lessons! These lessons are based on the S.C. Academic Standards for math in Grade 2. Each lesson has a video. You can watch the short video with your child. Some lessons have songs and books. There are handouts for each lesson that will give your child time to practice the math skill introduced. We end each lesson with a quick fluency check.

Lessons for Weeks 1 and 2

Time and Money lessons are part of the measurement standards. This year they learn to tell the difference between a.m. and p.m. and to use coins.

- Tell time to the nearest five minutes and use a.m. and p.m.
- Solve real-world problems using dollar bills with the \$ symbol and using coins with the ¢ symbol

Lessons for Weeks 3 and 4

Shapes and Fractions are part of the geometry standards. Second-grade students work with shapes and objects, dividing them into parts. Not only does this increase their knowledge of geometry, it establishes a foundation for fractions.

Identify triangles, quadrilaterals, hexagons, and cubes.

Draw shapes with a specific number of sides.

- Divide a rectangle into equal-sized rows and columns. Count to find the total number of the parts.
- After dividing shapes into equal parts, understand a half, a fourth, a half of, and a fourth of
- Recognize that parts of an object become smaller as the number of parts increases

For more information on the second grade math standards, please see the [Family-Friendly Guide for Second Grade Mathematics](#) provided by the SC Education Oversight Committee.
